Crypto-Politics : encryption and democratic practices in the digital era / Linda Monsees. - New York: Routledge, 2020. 153p.

Abstract: This book examines current debates about the politics of technology and the future of democratic practices in the digital era. The volume centres on the debates on digital encryption in Germany and the USA, during the aftermath of Edward Snowden’s leaks, which revolved around the value of privacy and the legitimacy of surveillance practices. Using a discourse analysis of mass media and specialist debates, it shows how these are closely interlinked with technological controversies and how, as a result, contestation emerges not within one public sphere but within multiple expert circles. The book develops the notion of ‘publicness’ in order to grasp the political significance of these controversies, thereby making an innovative contribution to Critical Security Studies by introducing digital encryption as an important site for understanding the broader debates on cyber security and surveillance. This book will be of much interest to students of critical security studies, science and technology studies, and International Relations.

2. Routledge international handbook of new digital practices in galleries, libraries, archives, museums and heritage sites / Edited by Hannah Lewi et al. - London: Routledge, 2020. 498p.

Abstract: The Routledge International Handbook of New Digital Practices in Galleries, Libraries, Archives, Museums and Heritage Sites presents a fascinating picture of the ways in which today's cultural institutions are undergoing a transformation through innovative applications of digital technology. With a strong focus on digital design practice, the volume captures the vital discourse between curators, exhibition designers, historians, heritage practitioners, technologists and interaction designers from around the world. Contributors interrogate how their projects are extending the traditional reach and engagement of institutions through digital designs that reconfigure the interplay between collections, public knowledge and civic society. Bringing together the experiences of some of today's most innovative cultural institutions and thinkers, the Handbook provides refreshingly new ideas and directions for the exciting digital challenges and opportunities that lie ahead. As such, it should be essential reading for academics, students, designers and professionals interested in the production of culture in the post-digital age.

3. Public policy in the Asian century : concepts, cases and futures / Edited by Sara Bice, Avery Poole and Helen Sullivan. - London: Palgrave Macmillan, 2018. 348p.

Abstract: This volume explores the defining features, critical approaches, challenges and opportunities for public policy in the Asian Century. This is the first book to systematically analyse the key institutions and practices that comprise public policy, administration and governance to investigate how they are changing in the context of increasing Asian influence. Its authors argue that the Asian Century holds the potential to generate a paradigm shift equivalent to the impacts of neo-liberalism and the New Public Management of the late 20th century. Divided into three parts, this volume interrogates the theories underpinning contemporary public policy; explores case studies from different policy arenas across the Asian region; and imagines what a future of globalised public policy might look like. It examines the implementation measures necessary to support policy and administration in an era of transnational governance networks, tightly linked economic markets and progressively fluid cultural exchanges. This book provides the concepts and tools necessary to navigate these shifting sands successfully. It is essential reading for scholars of public policy, public management, international relations, and politics and social sciences, as well as for administrators and public servants.

4. Duty of care in international relations : protecting citizens beyond the border / Edited by Nina Graeger and Halvard Leira. - New York: Routledge, 2020. 150p.

Abstract: This book offers a first overarching look at the relationship between states and their citizens abroad, approached through the concept 'Duty of Care'. How can society best be protected, when increasing numbers of citizens are found outside the borders of the state? What are the limits to care - in theory as well as in practical policy? With over 1.2 billion tourists crossing borders every day and more than 230 million expatriates, questions over the sort of duty states have for citizens abroad are politically pressing. Contributors explore both theoretical topics and empirical case studies, examining issues such as how to care for citizens who become embroiled in political or humanitarian crises while travelling, and exploring what rights and duties states should acknowledge toward nationals who have opted to take up arms for terrorist organizations. This work will be of great interest to scholars in a wide range of academic fields including international relations, international security, peacebuilding, ethics and migration.

Breaking the two-party doom loop : the case for multiparty democracy in America / Lee Drutman. - New York: Oxford University Press, 2020. 357p.

Abstract: American democracy is at an impasse. After years of zero-sum partisan trench warfare, our political institutions are deteriorating. Our norms are collapsing. Democrats and Republicans no longer merely argue; they cut off contact with each other. In short, the two-party system is breaking our democracy, and driving us all crazy. Deftly weaving together history, democratic theory, and cutting edge political science research, Drutman tells the story of how American politics became so toxic, why the country is trapped in a doom loop of escalating two-party warfare, and why it is destroying the shared sense of fairness and legitimacy on which democracy depends. He argues that the only way out is to have more partisanship—more parties, to short-circuit the zero-sum nature of binary partisan conflict. American democracy was once stable because the two parties held within them multiple factions, which made it possible to assemble flexible majorities and kept the temperature of political combat from overheating. But as conservative Southern Democrats and liberal Northeastern Republicans disappeared, partisan conflict flattened and pulled apart. Once the parties fully separated, toxic partisanship took over. With the two parties divided over competing visions of national identity, Democrats and Republicans no longer see each other as opponents, but as enemies. And the more the conflict escalates, the shakier our democracy feels. *Breaking the Two-Party Doom Loop* makes a compelling case for large scale electoral reform—importantly, reform not requiring a constitutional amendment—that would give America more parties, making American democracy more representative, more responsive, and ultimately more stable.

Cyberwar : how Russian hackers and trolls helped elect a president : what we don't, can't, and do know / Kathleen Hall Jamieson. - New York: Oxford University Press, 2020. 375p.

Abstract: In *Cyberwar*, Kathleen Hall Jamieson, who sifted through a vast amount of polling and voting data, is able to conclude with a reasonable degree of certainty that Russian help was crucial in elevating Trump to the Oval Office. Put simply, by changing the behavior of key players and altering the focus and content of mainstream news, Russian hackers reshaped the 2016 electoral dynamic. At the same time, Russian trolls used social media to target voting groups indispensable to a Trump victory or Clinton defeat. There are of course many arguments on offer that push against the idea that the Russians handed Trump his victory. Russia's goal was fomenting division, not electing Trump. Most of the Russian ads reportedly did not reference either the election or a candidate. Nor did they differ much from U.S.-based messaging that was already in play. Russian intervention did not surgically target Trump in key states. Finally, if WikiLeaks' releases of stolen email had truly affected the vote, Clinton's perceived honesty would have dropped in October. Jamieson, drawing from her four decades of research on the role of media in American elections, dispenses with these arguments through a forensic tracing of both Russian hackers' impact on media coverage as well as the ebbs and flows of Trump's polling support over the course of the campaign. Combining scholarly rigor with a bracing argument, *Cyberwar* shows that we can now be reasonably confident that Russian efforts helped put Trump in the White House.

Indo-Pacific empire : China, America and the contest for the world's pivotal region / Rory Medcalf. - Manchester: Manchester University Press, 2020. 310p.

Abstract: What we call a part of the world – Asia, Europe, the Middle East – seems innocuous. But the name of a region is totemic: a mental map that guides the decisions of leaders and the story of international order, war and peace. In recent years, the label ‘Indo-Pacific’ has suddenly gained wide use, including among the leaders of the United States, India, Japan, Australia, Indonesia, France and others. But what does it really mean? The Indo-Pacific is both a place and an idea. It is the region central to global prosperity and security. It is also a metaphor for collective action. If diplomacy fails, it will be the theatre of the first general war since 1945. But if its future can be secured, the Indo-Pacific will flourish as a shared space, the centre of gravity in a connected world. Written by a recognised expert and regional policy insider, this is the definitive guide to tensions in the region. It weaves together history, geopolitics, cartography, military strategy, economics, games and propaganda to address a vital question: how can China’s dominance be prevented without war?

8. **China & the World / Edited by David Shambaugh. - New York: Oxford University Press, 2020. 394p.**

Abstract: As the world evolves in increasingly unpredictable directions, one of the key determinants of the future global order will surely be the impact of China. No country and no society can escape China's reach-indeed many seek its embrace. China brings benefits to many-but it's also a problematic interlocutor for others. In *China and the World*, one of the world's leading China specialists David Shambaugh has assembled fifteen leading international authorities on China to create the most comprehensive and up-to-date scholarly assessment of China's foreign relations and roles in international affairs. The volume covers China's contemporary position in all regions of the world, with all major powers, and across multiple arenas of China's international interactions. It also explores the sources of China's grand strategy, how the past shapes the present, and the impact of domestic factors that shape China's external behavior. *China and the World* is a uniquely focused and well-organized volume that provides many insights into China's calculations and behavior, and identifies a number of challenges China will face in the future.

India way : strategies for an uncertain world / S. Jaishankar. - India: HarperCollins Publishers, 2020. 226p.

Abstract:The decade from the 2008 global financial crisis to the 2020 coronavirus pandemic has seen a real transformation of the world order. The very nature of international relations and its rules is changing before our eyes. For India, this means optimal relationships with all the major powers to best advance its goals. It also requires a bolder and non-reciprocal approach to the immediate and extended neighbourhood. A global footprint is now in the making that leverages India's greater capability and relevance, as well as its unique diaspora. This era of global upheaval entails greater expectations from India, putting it on the path to becoming a leading power. In *The India Way*, S. Jaishankar, India's Minister of External Affairs, analyses these challenges and spells out possible policy responses. In doing so, he is very conscious of balancing India's national interest with international responsibilities. He places this thinking in the context of history and tradition, appropriate for a civilizational power that seeks to reclaim its place on the world stage.

Corporate rich and the power elite in the twentieth century : how they won, why liberals and labor lost / G. William Domhoff. - New York: Routledge, 2020. 546p.

Abstract: The Corporate Rich and the Power Elite in the Twentieth Century demonstrates exactly how the corporate rich developed and implemented the policies and created the government structures that allowed them to dominate the United States. The book is framed within three historical developments that have made this domination possible: the rise and fall of the union movement, the initiation and subsequent limitation of government social-benefit programs, and the postwar expansion of international trade. The book's deep exploration into the various methods the corporate rich used to centralize power corrects major empirical misunderstandings concerning all three issue-areas. Further, it explains why the three ascendant theories of power in the early twenty-first century—interest-group pluralism, organizational state theory, and historical institutionalism—cannot account for the complexity of events that established the power elite's supremacy and led to labor's fall. More generally, and convincingly, the analysis reveals how a corporate-financed policy-planning network, consisting of foundations, think tanks, and policy-discussion groups, gradually developed in the twentieth century and played a pivotal role in all three issue-areas. Filled with new archival findings and commanding detail, this book offers readers a remarkable look into the nature of power in America during the twentieth century, and provides a starting point for future in-depth analyses of corporate power in the current century.

12. Aid power and politics / Edited by Iliana Olivie and Aitor Perez. - London: Routledge, 2020. 284p.

Abstract: Aid Power and Politics delves into the political roots of aid policy, demonstrating how and why governments across the world use aid for global influence, and exploring the role it plays in present-day global governance and international relations. In reconsidering aid as part of international relations, the book argues that the interplay between domestic and international development policy works in both directions, with individual countries having the capacity to shape global issues, whilst at the same time, global agreements and trends, in turn, shape the political behaviour of individual countries. Starting with the background of aid policy and international relations, the book goes on to explore the behaviour of both traditional and emerging donors (the US, the UK, the Nordic countries, Japan, Spain, Hungary, Brazil, and the European Union), and then finally looks at some big international agendas which have influenced donors, from the liberal consensus on democracy and good governance, to gender equality and global health. Aid Power and Politics will be an important read for international development students, researchers, practitioners and policy makers, and for anyone who has ever wondered why it is that countries spend so much money on the well-being of non-citizens outside their borders.

Negotiating at the United Nations : a practitioner's guide / Rebecca E. Webber Gaudiosi, Jimena Leiva Roesch and Ye-Min Wu. - Abingdon, Oxon: Routledge, 2019. 154p.

Abstract: This book offers a comprehensive practitioner's guide to negotiating at the United Nations. Although much of the content can be applied broadly, the guide focuses on navigating multilateral negotiations at the UN. The book is a tool to help new UN negotiators, explaining basic negotiation concepts and offering insight into the complexities of the UN system. It also offers a playbook for cooperation for negotiators at any level, exploring the dynamics of relationships and alliances, the art of chairing a negotiation, and the importance of balancing the power asymmetries present in any multilateral discussion. The book proposes improvements to the UN negotiation process and looks at the impact of information technologies on negotiation dynamics; it also shares stories from women UN delegates, illustrating what it means to be a female negotiator at the UN. This book is an exploration of the power of the individual in any negotiation, and of the responsibility all negotiators have in wielding that power to speak for a better world. This book will be of much interest to students of diplomacy, global governance, foreign policy, and International Relations, as well as practitioners and policymakers.

14. Prospects of evolution of the law of the sea, environmental law and the practice of ITLOS : new challenges and emerging / Edited by Tafsir Malick Ndiaye and Rodrigo Fernandes More. - Rio de Janeiro: SAGSERV, 2018. 365p.

Abstract: This article takes stock of the contribution of the International Tribunal for the Law of the Sea (ITLOS) to the development of international environmental law. It examines in this regard the jurisdiction of the tribunal and provides an overview of its environmental jurisprudence. It then assesses the potential role of ITLOS in relation to some marine environmental challenges ahead. In particular, it considers the possibility of a request for an advisory opinion on climate change, the settlement of disputes regarding deep seabed mining, and the potential role of the tribunal under a new legal instrument on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction.

15. Military balance 2020 : the annual assessment of global military capabilities and defence economics. - London: Routledge, 2020. 536p.

Abstract: The Military Balance is an authoritative assessment of the military capabilities and defence economics of 171 countries. Detailed A–Z entries list each country’s military organisation, personnel numbers, equipment inventories, and relevant economic and demographic data. Regional and select country analyses cover the major developments affecting defence policy and procurement, and defence economics. The opening graphics section displays notable defence statistics, while additional data sets detail selected arms orders and military exercises, as well as comparative defence expenditure and personnel numbers. The Military Balance is an indispensable handbook for anyone conducting serious analysis of security policy and military affairs. The International Institute for Strategic Studies, founded in 1958, is an independent centre for research, analysis and debate on the problems of conflict, however caused, that have, or potentially have, an important military dimension.

International order and the politics of disaster / Scott D. Watson. - New York: Routledge, 2020. 282p.

Abstract: In this indispensable and comprehensive text, Scott D. Watson critically examines the current understanding of international order that underpins international disaster management and disaster diplomacy. Based on empirical analysis of the three international disaster management regimes - disaster relief, disaster risk reduction, and disaster migration - and case studies of disaster diplomacy in the United States, Egypt and China, Watson argues that international disaster management and disaster diplomacy are not simply efforts to reduce the impact of disasters or to manage bilateral relations but to reinforce key beliefs about the larger international order. Challenging the conventional understandings of disasters as natural, as exogenous shocks, or as unintended and accidental outcomes of the current order, this text shows how the ideological foundations of the current heterogeneous international order produce recurrent disasters. *International Order and the Politics of Disaster* is a vital source for undergraduate or graduate students interested in international responses to disasters and complex humanitarian emergencies, forced migration and displacement, as well as climate change and development.

Abstract: Digital Media and Wireless Communication in Developing Nations: Agriculture, Education, and the Economic Sector explores how digital media and wireless communication, especially mobile phones and social media platforms, offer concrete opportunities for developing countries to transform different sectors of their economies. The volume focuses on the agricultural, economic, and education sectors. The chapter authors, mostly from Africa and India, provide a wealth of information on recent innovations, the opportunities they provide, challenges faced, and the direction of future research in digital media and wireless communication to leverage transformation in developing countries. The volume provides important research on digital media and wireless communication within the context of developing countries that will be very useful for professionals from academia, government agencies, NGOs, technologists, entrepreneurs and investors, and others.

Man of contradictions : Joko Widodo and the struggle to remake Indonesia / Ben Bland. - Australia: Penguin random house, 2020. 180p.

Abstract: From a riverside shack to the presidential palace, Joko Widodo surged to the top of Indonesian politics on a wave of hope for change. However, six years into his presidency, the former furniture maker is struggling to deliver the reforms that Indonesia desperately needs. Despite promising to build Indonesia into an Asian powerhouse, Jokowi, as he is known, has faltered in the face of crises, from COVID-19 to an Islamist mass movement. *Man of Contradictions*, the first English-language biography of Jokowi, argues that the president embodies the fundamental contradictions of modern Indonesia. He is caught between democracy and authoritarianism, openness and protectionism, Islam and pluralism. Jokowi's incredible story shows what is possible in Indonesia – and it also shows the limits.

China's vision of victory / Jonathan D. T. Ward. - America: Atlas Publishing, 2019. 278.

Abstract: Someday we may say that we never saw it coming. After seventy-five years of peace in the Pacific, a new challenger to American power has emerged, on a scale not seen in generations. Working from a deep sense of national destiny, the Chinese Communist Party is guiding a country of 1.4 billion people towards what it calls "the great rejuvenation of the Chinese nation," and, with it, the end of an American-led world. Will this generation witness the final act for America as a superpower? Can American ingenuity, confidence, and will power outcompete the long-term strategic thinking and planning of China's Communist Party? These are the challenges that will shape the next decade and more. China's Vision of Victory brings the reader to a new understanding of China's planning, strategy, and ambitions. From seabed to space, from Africa to the Arctic, from subsurface warfare to the rise of China's global corporations, this book will illuminate for the reader the new great game of our lifetimes, and how our adversary sees it all.

Man who ran Washington : the life and times of James A. Baker III / Peter Baker and Susan Glasser. - New York: Doubleday, 2020. 694p.

Abstract: From two of America's most revered political journalists comes the definitive biography of legendary White House chief of staff and secretary of state James A. Baker III: the man who ran Washington when Washington ran the world. For a quarter-century, from the end of Watergate to the aftermath of the Cold War, no Republican won the presidency without his help or ran the White House without his advice. James Addison Baker III was the indispensable man for four presidents because he understood better than anyone how to make Washington work at a time when America was shaping events around the world. *The Man Who Ran Washington* is a page-turning portrait of a power broker who influenced America's destiny for generations. A scion of Texas aristocracy who became George H. W. Bush's best friend on the tennis courts of the Houston Country Club, Baker had never even worked in Washington until a devastating family tragedy struck when he was thirty-nine. Within a few years, he was leading Gerald Ford's campaign and would go on to manage a total of five presidential races and win a sixth for George W. Bush in a Florida recount. He ran Ronald Reagan's White House and became the most consequential secretary of state since Henry Kissinger. He negotiated with Democrats at home and Soviets abroad, rewrote the tax code, assembled the coalition that won the Gulf War, brokered the reunification of Germany and helped bring a decades-long nuclear superpower standoff to an end. Ruthlessly partisan during campaign season, Baker governed as the avatar of pragmatism over purity and deal-making over division, a lost art in today's fractured nation. His story is a case study in the acquisition, exercise, and preservation of power in late twentieth-century America and the story of Washington and the world in the modern era--how it once worked and how it has transformed into an era of gridlock and polarization. This masterly biography by two brilliant observers of the American political scene is destined to become a classic.
