1. Hafez, Sherine

Women of the Midan : the untold stories of Egypt's revolutionaries / Sherine Hafez. - USA: Indiana University Press, 2019. 216p.

Abstract: In *Women of the Midan*, Sherine Hafez demonstrates how women were a central part of revolutionary process of the Arab Spring. Women not only protested in the streets of Cairo, they demanded democracy, social justice, and renegotiation of a variety of sociocultural structures that repressed and disciplined them. Women's resistance to state control, Islamism, neoliberal market changes, the military establishment, and patriarchal systems forged new paths of dissent and transformation. Through firsthand accounts of women who participated in the revolution, Hafez illustrates how the gendered body signifies collective action and the revolutionary narrative. Using the concept of rememory, Hafez shows how the body is inseparably linked to the trauma of the revolutionary struggle. While delving into the complex weave of public space, government control, masculinity, and religious and cultural norms, Hafez sheds light on women's relationship to the state in the Arab world today and how the state, in turn, shapes individuals and marks gendered.

2. Berntzen, Lars Erik

Liberal roots of far right activism : the Anti-Islamic movement in the 21st century / Lars Erik Berntzen. - London: Routledge, 2020. 212p.

Abstract: This book explores the anti-Islamic turn and expansion of the far right in Western Europe, North America and beyond from 2001 and onwards. Driven by terror attacks and other moral shocks, the anti-Islamic cause has undergone four waves of transnational expansion in the period since 2001. The leaders and intellectuals involved have varied backgrounds, many coming from the left, uniting historically opposed sets of values under their banner of a civilizational struggle against Islam. The findings presented in this book indicate that anti-Islamic initiatives in Western Europe and the United States form a transnational movement and subculture characterized by a fragile balance between liberal and authoritarian values. The author draws on a broad array of data sources and methods, including network analysis and sentiment analysis, to analyze the impact of the anti-Islamic expansion and turn at a macro level, and the theoretical implications for our understanding of the current far right flowing from this. Offering an overview of anti-Islamic activism, the book explores the background of their leaders and ideologues, provides an in-depth look at their ideology, online organizational networks, and the views expressed by their online members as well as which emotions and messages continue to drive their mobilization. The book will be of interest to scholars in the social movement field as well as political scientists, sociologists, and general readers interested in issues such as populism, extremism and understanding the ways in which the contemporary far right challenges liberal democracies.

3. Wheaton, Elizabeth M.

Economics of human rights / Elizabeth M. Wheaton. - London: Routledge, 2019. 288p.

Abstract: Economics plays a key role in human rights issues as decision-makers weigh the incentives associated with choosing how to use scarce resources in the context of committing or escaping human rights violence. This textbook provides an introduction to the microeconomic analysis of human rights utilizing economics as a lens through which to examine social topics including capital punishment, violence against women, asylum seeking, terrorism, child abuse, genocide, and hate. Whether analyzing the decisions made in capital punishment cases, the causes and consequences of genocide, or the impact of terrorist acts on domestic and international decision-making, the science of economics provides tools and a systematic method of analysis and policy recommendation. This key text presents a method for integrating the social sciences of economics and human rights to create new opportunities for the investigation of social issues. Within each chapter, readers gain a fundamental understanding of a specific human rights issue, the decision-makers and the decision-making process involved, and the benefits and costs leading to the decisions. Experts on each issue, drawn from a variety of fields, contribute to each chapter and present first-hand accounts and different perspectives on each issue. The detailed analyses and accounts provided also explore the potential incentives involved in the prevention and termination of human rights violations. Aiming to further economic inquiry and enhance interdisciplinary research, this textbook serves as a multi-purpose guide for a range of readers. Students, researchers, and educators, as well as those working in organizations supporting victims of human rights violations and policy-makers facing human rights challenges, will find this book informative and engaging.

4. Reddaway, Peter

Dissidents : a memoir of working with the resistance in Russia, 1960-1990 / Peter Reddaway. - Washington, D.C.: Brooking Institution Press, 2020. 338p.

Abstract: It has been nearly three decades since the collapse of the Soviet Union—enough time for the role that the courageous dissidents ultimately contributed to the communist system’s collapse to have been largely forgotten, especially in the West. This book brings to life, for contemporary readers, the often underground work of the men and women who opposed the regime and authored dissident texts, known as samizdat, that exposed the tyrannies and weaknesses of the Soviet state both inside and outside the country. Peter Reddaway spent decades studying the Soviet Union and got to know these dissidents and their work, publicizing their writings in the West and helping some of them to escape the Soviet Union and settle abroad. In this memoir he captures the human costs of the repression that marked the Soviet state, focusing in particular on Pavel Litvinov, Larisa Bogoraz, General Petro Grigorenko, Anatoly Marchenko, Alexander Podrabinek, Vyacheslav Bakhmin, and Andrei Sinyavsky. His book describes their courage but also puts their work in the context of the power struggles in the Kremlin, where politicians competed with and even succeeded in ousting one another. Reddaway’s book takes readers beyond Moscow, describing politics and dissident work in other major Russian cities as well as in the outlying republics.

5. Moosa, Imad A.

Economics of war : profiteering, militarism and imperialism / Imad A. Moosa. - Northampton: Edward Elgar Publishing, 2019. 229p.

Abstract: Bad things occur and persist because of the presence of powerful beneficiaries. In this provocative and illuminating book, Imad Moosa illustrates the economic motivations behind the last 100 years of international conflict, citing the numerous powerful individual and corporate war profiteers that benefit from war. Inspired and informed by *War is a Racket*, the 1935 work of General Smedley Butler, the author explores historic and contemporary incidents of war profiteering, identifying individuals and groups that have increased their wealth through the supply of weaponry, mercenaries, provisions and finance in times of war. This book offers a caustic indictment of the military-industrial complex, exploring the privatisation of conflict that has fuelled war across the globe. Providing a contemporary, in-depth analysis of the economics of war, this book is critical for academics and students of war studies, international relations and military and political history. Policy makers will also benefit from this book's comprehensive analysis of wartime policy and practice.

6. Reisman, David

Global political economy : beyond the nation state / David Reisman. - Cheltenham, United Kingdom: Edward Elgar Publishing, 2019. 244p.

Abstract: Economics is business, and politics is power. In this insightful book, David Reisman explores the interaction between authority and exchange in a global village where individual nation states – once the pinnacle of political organisation – increasingly depend on each other for their material well-being. Taking a transnational and impartial perspective, the author builds a comprehensive and intricate narrative. He dissects the emergence of the contemporary global economy and explains its impact on the sovereignty and strength of nations. Reisman explores the ways in which liberals, socialists and nationalists can reach a viable consensus in a new social order where the national interest must be the global interest as well. Offering authoritative, integrated and critical guidance to a topic that is of ever greater importance, this book is crucial reading for students of global political economy and international politics.

7. New politics of aid : emerging donors and conflict- affected states / Edited by Agnieszka Paczynska. - Colorado: Lynne Rienner Publishers, 2020. 197p.

Abstract: How do emerging donors conceptualize the relationship between security and development? How, and why, do the policies they pursue in conflict-affected states differ from the liberal peacebuilding model of traditional donors? Addressing these questions, the authors of *The New Politics of Aid* shed light on the increasingly complicated and complex donor landscape. Their work is an essential contribution to our understanding of both the changing dynamics of foreign aid and the processes of postconflict reconstruction and peacebuilding.

8. Campbel, Dennis

Regulatory compliance : international perspectives / Dennis Campbell. - Alphen aan den Rijn: Wolters Kluwer, 2019. 352p.

Abstract: The core legal concepts underlying compliance and their impact on business operations encompass corporate governance, cyberlaw and security, financial services regulations, and compliance issues in health care and biotechnology. “Compliance”, a term often invoked but subject to a variety of iterations. To engage in compliance services, lawyers must have a good knowledge of the regulated industry that they serve, an understanding of risk management, and the skills to draft policy statements, provide financial reporting, and advise in the development of projects. In this edition of the Comparative Law Yearbook of International Business, lawyers from nine jurisdictions examine recent developments in their respective countries pertaining to compliance issues. Chapters are provided by practitioners from Argentina, India, Nigeria, Poland, Portugal, Switzerland, Thailand, the United Kingdom, and the United States. The publication also includes two appendices: General Assembly Resolution 58/4 of 31 October 2003, United Nations Convention against Corruption, and General Assembly Resolution 55/25 of 15 November 2000, United Nations Convention against Transnational Organized Crime.

9. Data protection and privacy: data protection and democracy / Edited by Dara Hallinan et. all. - Chicago: Hart Publishing, 2020. 319p.

Abstract: The subjects of this volume are more relevant than ever, especially in light of the raft of electoral scandals concerning voter profiling. This volume brings together papers that offer conceptual analyses, highlight issues, propose solutions, and discuss practices regarding privacy and data protection. It is one of the results of the twelfth annual International Conference on Computers, Privacy and Data Protection, CPDP, held in Brussels in January 2019. The book explores the following topics: dataset nutrition labels, lifelogging and privacy by design, data protection iconography, the substance and essence of the right to data protection, public registers and data protection, modelling and verification in data protection impact assessments, examination scripts and data protection law in Cameroon, the protection of children's digital rights in the GDPR, the concept of the scope of risk in the GDPR and the ePrivacy Regulation. This interdisciplinary book has been written at a time when the scale and impact of data processing on society – not only on individuals, but also on social systems – is becoming ever starker. It discusses open issues as well as daring and prospective approaches, and will serve as an insightful resource for readers with an interest in computers, privacy and data protection.

10. Guide to the GDPR / Edited by Maciej Gawronski. - Netherlands: Kluwer Law International, 2019. 345p.

Abstract: To execute and guarantee the right to privacy and data protection within the European Union (EU), the EU found it necessary to establish a stable, consistent framework for personal data protection and to enforce it in a decisive manner. This book, the most comprehensive guide available to the General Data Protection Regulation (GDPR), is the first English edition, updated and expanded, of a bestselling book published in Poland in 2018 by a renowned technology lawyer, expert to the European Commission on cloud computing and to the Article 29 Working Party (now: the European Data Protection Board) on data transfers who in fact contributed ideas to the GDPR. The implications of major innovations of the new system – including the obligation of businesses to consult the GDPR first rather than relevant Member State legislation and the extension of the GDPR to companies located outside of the European Economic Area – are fully analysed for the benefit of lawyers and companies worldwide.

11. Pehlivan, Oguz Kaan

Confronting cyberespionage under international law / Oguz Kaan Pehlivan. - New York: Routledge, 2019. 129p.

Abstract: We have witnessed a digital revolution that affects the dynamics of existing traditional social, economic, political and legal systems. This revolution has transformed espionage and its features, such as its purpose and targets, methods and means, and actors and incidents, which paves the way for the emergence of the term cyberespionage. This book seeks to address domestic and international legal tools appropriate to adopt in cases of cyberespionage incidents. Cyberespionage operations of state or non-state actors are a kind of cyber attack, which violates certain principles of international law but also constitute wrongful acquisition and misappropriation of the data. Therefore, from the use of force to state responsibility, international law offers a wide array of solutions; likewise, domestic regulations through either specialized laws or general principles stipulate civil and criminal remedies against cyberespionage.

12. O'Hanlon, Michael E.

Senkaku paradox : risking great power war over small stakes / Michael E. O'Hanlon. - Washigton, D.C: Brooking Institution Press, 2019. 258p.

Abstract: In recent years, the Pentagon has elevated its concerns about Russia and China as potential military threats to the United States and its allies. But what issues could provoke actual conflict between the United States and either country? And how could such a conflict be contained before it took the world to the brink of thermonuclear catastrophe, as was feared during the cold war? Defense expert Michael O'Hanlon wrestles with these questions in this insightful book, setting them within the broader context of hegemonic change and today's version of great-power competition. The book examines how a local crisis could escalate into a broader and much more dangerous threat to peace. What if, for example, Russia's "little green men" seized control of a community, like Narva or an even smaller town in Estonia, now a NATO ally? Or, what if China seized one of the uninhabited Senkaku islands now claimed and administered by Japan, or imposed a partial blockade of Taiwan? Such threats are not necessarily imminent, but they are far from inconceivable. Washington could be forced to choose, in these and similar cases, between risking major war to reverse the aggression, and appeasing China or Russia in ways that could jeopardize the broader global order. O'Hanlon argues that the United States needs a better range of options for dealing with such risks to peace. He advocates "integrated deterrence," which combines military elements with economic warfare. The military components would feature strengthened forward defenses as well as, possibly, limited military options against Russian or Chinese assets in other theaters.

13. Hudson, Darren

Irrational terrorist : and other persistent terrorism myths / Darren Hudson et. all. - Boulder: Lynne Rienner Publishers, 2020. 165p.

Abstract: Opinion surveys show that what the public assumes it knows about terrorism is at best a badly distorted view. Recalling the "Flat Earth" phenomenon, early misconceptions have become solidified, despite new evidence refuting them. The authors of *The Irrational Terrorist* discredit these popular myths and misconceptions, providing an accessible overview of the key theoretical explanations of terrorism and liberally illustrating their analysis with case studies. Ranging from the religious and economic backgrounds of individual terrorists to the nature and outreach of terrorist organizations, they offer fact-based, cutting-edge explanations of the motivations and behavior of terrorist groups.

14. Handbook of terrorism and counter terrorism post 9/11 / Edited by David Martin Jones et al. - Cheltenham, United Kingdom: Edward Elgar Publishing, 2019. 447p.

Abstract: The events of 9/11 gave rise to a new epoch in world history. This Handbook examines how the world order and our understanding of war and peace has been transformed since the global war on terror began. Bringing together expert commentators and academics from Asia, US, Europe and the Middle East, the Handbook of Terrorism and Counter Terrorism Post 9/11 assesses regional responses to terrorism and evaluates the emergence of new threats. This timely reflection on the consequences of the global war on terror considers the future of asymmetric conflict in the context of the fourth industrial revolution, and the evolution of cyber warfare. Providing an analysis of terrorism since 2001, from Al Qaeda to Daesh, and a critical evaluation of counter terrorism and counter insurgency, this Handbook is an essential primer for students, at all levels, researching terrorism, insurgency, global warfare and international relations. It will also benefit defence and security personnel enrolled on postgraduate courses in military academies.

15. Global challenges, governance, and complexity : applications and frontiers / Edited By Victor Galaz. - Cheltenham, Uk: Edward Elgar Publishing, 2019. 317p.

Abstract: Through exploring the application of a complex systems lens on important global challenges, this timely book offers key insights into successful governance in our changing world. It illustrates a number of theoretical and methodological approaches to help understand the role of decision-making, policies, institutions and networks in navigating complexity. Bringing together leading international scholars, *Global Challenges, Governance, and Complexity* elaborates important features of complex adaptive systems and their connections to key governmental and political issues. These include: complexity leadership, environmental and sustainability challenges, the role of economics, policy-making, legal and social dimensions of systemic risks, and the effectiveness of polycentricity. Chapters look at novel research in the field, highlighting how a diverse range of disciplinary approaches to governance can improve our understanding of complex global challenges. Political science and sustainability science scholars, particularly those with a keen interest in environmental politics and sustainability, will greatly benefit from reading this book. The insights offered will also be of use to policy makers wishing to gain a more thorough understanding of the field.

16. Research handbook on economic diplomacy : bilateral relations in a context of geopolitical change / Edited by Peter A.G. Van Bergeijk and Selwyn J.V. Moons. - Cheltenham, United Kingdom: Edward Elgar Publishing, 2018. 403p.

Abstract: Bilateral economic diplomacy is an increasingly popular method of ensuring both commercial and broader economic interests. In this Handbook over 30 leading experts from developed and developing countries, industrial nations and emerging economies have come together to form a global view of economic diplomacy. Representing a move away from Euro-centric books on the topic, this Handbook uses a combination of qualitative and quantitative research to explore how state visits, embassies and economic sanctions are being increasingly used as forms of diplomacy. Editors Peter van Bergeijk and Selwyn Moons have ensured that the entire research process is covered, from data collection to evidence based policy advice. As such, the Handbook reveals how and under which conditions economic diplomacy can be most effective, proving an invaluable tool for future research. The Research Handbook on Economic Diplomacy is a key resource for academics and researchers at policy institutions who wish to understand the field in greater depth. Policy makers and other actors at domestic and international levels would also greatly benefit from this extensive international view of economy diplomacy.

17. Border trade in North-East India : a politico-economic perspective / Edited by Mayashree B. Das and Ruma Das. - New Delhi: Indu Book Services, 2019. 145p.

Abstract: The North East Region shares only about 2% of its border with mainland India and the remaining 98% is with the neighbouring countries like China, Bhutan, Myanmar and Bangladesh. Hence the significance and relevance of border trade with its neighbours of the region cannot be overruled because it can serve as an engine of growth for the trading partners. Through proper steps and policy measures the Govt. of India envisages to develop the economically stagnating region and convert it from being a security problem into a region of economic opportunities. As a part of India's response to globalisation, the Govt. of India adopted policies like Look East and Act East to develop economic ties with the South East Asian Nations. This was done keeping in mind the rapid economic development of the neighbouring countries of the region which could be potential markets for exporting indigenous and local products for the ever expanding demands of these emerging economies. The Book explores the social, political and cultural implications of border trade on the tribal societies of North East India. In addition the book also highlights the relevance of border trade in revamping of the economy of the North East and addressing the existing challenges as well as the prospects of the same.

19. Conley, S. Richard

Donald Trump and American populism / Richard S. Conley. - Edinburgh: Edinburgh University Press, 2020. 433p.

Abstract: This book evaluates the presidency of Donald Trump from a comparative, historical approach to connect his populist style to his predecessors. Trump’s method of communication through social media obviously differs from previous candidates and presidents with populist platforms, but his themes - a disdain for elites, grassroots support, majoritarianism, anti-intellectual discourse, and nativism—borrow variably from such figures as Andrew Jackson, Huey Long, Barry Goldwater, and Ross Perot. As such, Trump’s approach to governance falls within a long tradition of populism dating to the 19th Century.

20. Trumping truth : essays on the destructive power of "alternative facts" / Edited by Salvador Jimenez Murguia. - North Carolina: McFarland & Company, 2019. 243p.

Abstract: When Kellyanne Conway, counselor to President Trump, coined the phrase "alternative facts" in January 2017, objectivity in public discourse--the long-held belief in a more or less agreed-upon set of verifiable truths--went into a tailspin. The use of alternative facts and narratives quickly became the go-to rhetorical strategy, especially among Trump's administration and base. Rebuttals based on fact-checking and hard data were demoted to mere choices in a media bazaar where consumers are free to source their own versions of reality. This volume explores the social and political disruption accompanying the loss of faith in objectivity, along with reflections on the disregard for truth and honesty, both within the Trump Administration and in contemporary popular culture.
