1. Zakaria, Fareed

Ten lessons for a post-pandemic world / Fareed Zakaria. - New York: W. W. Norton & Company, 2020. 307p.

Abstract: COVID-19 is speeding up history, but how? What is the shape of the world to come? Lenin once said, "There are decades when nothing happens and weeks when decades happen." This is one of those times when history has sped up. CNN host and best-selling author Fareed Zakaria helps readers to understand the nature of a post-pandemic world: the political, social, technological, and economic consequences that may take years to unfold. Written in the form of ten "lessons," covering topics from natural and biological risks to the rise of "digital life" to an emerging bipolar world order, Zakaria helps readers to begin thinking beyond the immediate effects of COVID-19. *Ten Lessons for a Post-Pandemic World* speaks to past, present, and future, and, while urgent and timely, is sure to become an enduring reflection on life in the early twenty-first century.

2. Robinson, Glenn E.

Global Jihad : a brief history / Glenn E. Robinson. - Stanford, California: Stanford University Press, 2021. 246p.

Abstract: Since the 1980s, global jihad has seen four distinct iterations, or waves, each emerging from a particular crisis, and each with its own ideology and program for achieving a global end, be it creating a Jihadi International to liberate occupied Muslim lands, driving the Americans out of the Muslim world, recreating a new and radical caliphate throughout all of the lands once ruled by Muslims, or mounting a global but leaderless jihad to keep alive hope for a more powerful global jihad movement in the future. This book tells the story of those four waves of global jihad: their origins, the evolutions, and their quite distinct ideologies.

3. Democracy in crisis around the World / Edited by Saliba Sarsar and Rekha Datta. - Lanham, Maryland: Lexington Books, 2020. 272p.

Abstract: In the twenty-first century, democracies across the globe are in crisis. The strength of basic democratic institutions and core enduring political principles and values are eroding in key regions and countries. Authoritarian regimes are rising and populist leaders are emerging. Democracy in Crisis across the World weaves threads of history and politics in two parts to analyze how long this trend may last and what the future may bring. By first examining the state of democracy in Sub-Saharan Africa, Eastern Europe, Western Europe, Latin America, and the Middle East and North Africa, the second part of the collection highlights to democratic trajectory of India, China, Russia, and the United States. Ending with a look at how the world's governments have responded to the coronavirus pandemic, contributors argue that unless democracy is defended with resolution and nurtured with resilience, it will fall.

4. Global diplomacy : an introduction to theory and practice / Edited by Thierry Balzacq; Frederic Charillon and Frederic Ramel. - Switzerland: Palgarve Macmillan, 2020. 344p.

Abstract: This volume brings together different and transdisciplinary approaches to diplomacy both as an institution and a practice. The authors examine diplomacy from their own backgrounds and through sociological traditions, which shape the study of international relations (IR) in Francophone countries. The volume's global character articulates the Francophone intellectual concerns with a variety of scholarships on diplomacy, providing a first contact with this subfield of IR for students and practitioners. Thierry Balzacq is Professor of Political Science at Sciences Po, Paris, and Researcher at the Centre for International Studies (CERI Sciences Po), France. Frédéric Charillon is Professor of Political Science at Université Clermont Auvergne (UCA), and Coordinator for International Studies at ENA (French National School of Administration), France. Frédéric Ramel is Professor of Political Science at Sciences Po, Paris, and Researcher at the Centre for International Studies (CERI Sciences Po), France.

5. China-North Korea relations : between development and security / Edited by Catherine Jones and Sarah Teitt. - Cheltenham: Edward Elgar Publishing, 2020. 215p.

Abstract: Developing a new approach to exploring security relations between China and North Korea, this timely book examines China's contradictory statements and actions through the lens of developmental peace. It highlights the differences between their close relationship on the one hand, and China's votes in favour of sanctions against North Korea on the other, examining the background to this and its importance. Contributors demonstrate how a novel perspective of developmental peace can explain China's seemingly contradictory approach to North Korea, both historically and in the current day. Featuring top scholars from China and South Korea, as well as primary evidence from China, North and South Korea, it greatly improves the understanding of the current perspectives in each state, and the impact they have on this vital security relationship. Asian studies - and in particular Chinese studies - scholars will appreciate the in-depth analysis of China's approach to relations with North Korea, as well as the first-hand evidence used. The analysis of the difficulties in China providing a singular approach to its relations will be useful to policy-makers and scholars looking into the complexities of foreign policy.

7. Davidson, James Dale

Sovereign individual : mastering the transition to the information age / James Dale Davidson and Lord William Rees-Mogg. - New York: Touchstone, 2020. 446p.

Abstract: Two renowned investment advisors and authors of the bestseller *The Great Reckoning* bring to light both currents of disaster and the potential for prosperity and renewal in the face of radical changes in human history as we move into the next century. *The Sovereign Individual* details strategies necessary for adapting financially to the next phase of Western civilization. Few observers of the late twentieth century have their fingers so presciently on the pulse of the global political and economic realignment ushering in the new millennium as do James Dale Davidson and Lord William Rees-Mogg. Their bold prediction of disaster on Wall Street in *Blood in the Streets* was borne out by Black Tuesday. In their ensuing bestseller, *The Great Reckoning*, published just weeks before the coup attempt against Gorbachev, they analyzed the pending collapse of the Soviet Union and foretold the civil war in Yugoslavia and other events that have proved to be among the most searing developments of the past few years. In *The Sovereign Individual*, Davidson and Rees-Mogg explore the greatest economic and political transition in centuries -- the shift from an industrial to an information-based society. This transition, which they have termed "the fourth stage of human society," will liberate individuals as never before, irrevocably altering the power of government. This outstanding book will replace false hopes and fictions with new understanding and clarified values.

8. China in Africa : between imperialism and partnership in humanitarian development / Edited by Sabella Abidde and Tokunbo A. Ayoola. - Lanham: Lexington Books, 2021. 369p.

Abstract: This book examines Sino-African relations and their impact on Africa. It argues that Africa's relationship with China has had a profound impact on key sectors in Africa—economic and political development, the media, infrastructural development, foreign direct investments, loans, debt peonage, and international relations. The authors also analyze the imperialist and neo-colonialist implications of this relationship and discuss the degree to which the relationship is beneficial to Africa.

9. Chaturvedi, Sachin

2030 agenda and India : moving from quantity to quality : exploring convergence and transcendence / Edited by Sachin Chaturvedi et al.. - Singapore: Springer, 2019. 301p.

Abstract: This book presents a selection of multifaceted development issues involving social, economic and environmental aspects, in order to inspire and guide implementation of the United Nations' SDGs. It focuses on economic development, human well-being and sustainable pathways, with special attention to financial and knowledge resources, as well as measurement concepts. In doing so, the book draws a distinction between sustainability and sustainable pathways by refraining from dealing with broader and more direct environmental sustainability issues like climate change, environmental degradation and sustainable energy. The choice of topics, apart from their relevance for India, was guided by their importance in connection with multiple SDG goals. In addition to revealing the intricacies of systemic relationships and the dilemmas they create in policy choices, the book examines the role of actors and the critical importance of partnerships to help readers comprehend the breadth of diversities and inter-linkages involved. The roles of the central and state governments, the parliament and the state assemblies, the civil society, UN agencies and district-level authorities are separately explored in depth. Sharing valuable insights, the book encourages policymakers, practitioners and scholars to move towards a sustainable and equitable economy, and supports them in their efforts.

10. China's globalization and the belt and road initiative / Edited by Jean A. Berlie. - Switzerland: Palgarve Macmillan, 2020. 240p.

Abstract: This book explains the importance of globalization and the Belt and Road Initiative, which is one of the essential projects of President Xi Jinping, and where China fits on the global arena. Additionally, the contributors cover such important topics as China's maritime traffic, infrastructure along the modern Silk Road, the South China Sea, and China's relationship with Indonesia, Malaysia, East Timor, Hong Kong, and Macao. This edited volume will interest scholars, researchers, and students in the fields of Asian studies, globalization, political science, and Chinese politics.

11. Sondhi, Neena ed.

Comparative development of India & China : economic, technological, sectoral & socio-cultural insights / Edited by Neena Sondhi et al.. - India: Sage Publications, 2021. 491p.

Abstract: The prodigious economic growth of India and China over the last three decades has ensured their rightful prominence in the global economic order. The two players opened up their respective economies to liberalization and market regulations, which led to a tectonic shift from agriculture-based economies to manufacturing and service-based economies. In this context, Comparative Development of India and China offers contemporary research on economic, technological, sectoral and sociocultural issues by highlighting the opportunities as well as vulnerabilities in the development of the two fastest growing nations in the world. It unveils the similarities of thought and practices, and explores the plethora of possibilities for collaborative effort that may serve to contribute to the prosperity and progress of both the countries. The perspectives presented by various Indian and Chinese scholars in this edited volume provide varied outlooks and insights on these two nations, albeit within a single thematic framework.

12. McMaster, H. R.

Battlegrounds : the fight to defend the free world / H. R. McMaster. - New York: HarperCollins Publishers, 2020. 889p.

Abstract: Across multiple administrations since the end of the Cold War, American foreign policy has been misconceived, inconsistent, and poorly implemented. As a result, America and the free world have fallen behind rivals in power and influence. Meanwhile threats to security, freedom, and prosperity, such as nuclear proliferation and jihadist terrorism have grown. In *Battlegrounds*, H.R. McMaster describes efforts to reassess and fundamentally shift policies while he was National Security Advisor. And he provides a clear pathway forward to improve strategic competence and prevail in complex competitions against our adversaries. *BATTLEGROUNDS* is a groundbreaking reassessment of America's place in the world, drawing from McMaster's long engagement with these issues, including 34 years of service in the U.S. Army with multiple tours of duty in battlegrounds overseas and his 13 months as National Security Advisor in the Trump White House. It is also a powerful call for Americans and citizens of the free world to transcend the vitriol of partisan political discourse, better educate themselves about the most significant challenges to national and international security and work together to secure peace and prosperity for future generations.

13. Chopra, Anil

China, the rising aerospace power : implications for India / Anil Chopra. - New Delhi: Pentagon Press LLP, 2020. 283p.

Abstract: Among the many defining developments of the 21st Century is the Rise of China in every sphere of economic and military power. The world is going through a period of strategic uncertainty as China seeks to dislodge the United States as the leading power in Indo-Pacific region. While USA wants a “uni-polar world, but a bi-polar Asia”, China is clearly working towards a “bi-polar world and uni-polar Asia”. In its quest for what it thinks is its rightful place, China believes that the one who controls aerospace, controls the planet. China has been investing heavily in “aerospace” technologies and capabilities, which has been part of its so-called “peaceful rise” strategy. China has had major boundary disputes with a large number of its neighbours, including India. It has often tried to use muscle-flexing approach to resolve them. Chinese rising military power thus has implications for India. This book, China The Rising Aerospace Power - Implications for India is aimed at comprehensive evaluation of how the Chinese aerospace technologies, industrial capability, the People’s Liberation Army Air Force (PLAAF) and various other elements of air and space are getting into place. In the very dynamic, and continuously evolving scenario, the book is meant to be a one stop place to understand the current status and unfolding future of Chinese aerospace power.

14. **Regions in the belt and road initiative / Edited by Jonathan Fulton. - Abingdon, Oxon: Routledge, 2020. 147p.**

Abstract: China's Belt and Road Initiative (BRI) has had a significant impact within Asia and across other regions. This book provides empirical case studies examining the relations between China and the states in specific regional groupings, including South-East Asia, Central Asia, South Asia, the Persian Gulf, the Horn of Africa, and Central/Eastern Europe. At the theoretical level, Buzan and Waever's work on regional security complexes is used to develop a framework for analyzing the current impact of the BRI and its potential future effects within these regions, while the case studies explore the extent to which different International Relations and International Political Economy theories explain change in these relationships as the regional security environment shifts. The contributors address questions as diverse as the domestic political and economic drivers impacting the level of BRI cooperation; the effects of cooperation with the US; as well as the historical political and economic risk considerations for China in pursuing BRI cooperation; and the motivations of regional responses to the BRI and rivalries and variations in those responses. This book will be of interest to academics working in the fields of Chinese foreign policy, International Relations, International Political Economy, and area studies. Professionals in the corporate world and Governmental practitioners and non-government agencies will also find the contributions useful.

15. Mukherjee, Pranab

Presidential years : 2012-2017 / Pranab Mukherjee. - New Delhi: Rupa Publication India, 2021. 197p.

Abstract: The presidential years gives a fascinating account of how one of the country most respected veteran politicians reshaped the functioning of Rashtrapati Bhavan and responded to tumultuous events as the country first citizen, leaving behind a legacy that will be hard to match. Pranab Mukherjee became President of India after having spent several decades in politics, and there was great speculation over how he would approach his new bipartisan role after having been associated with a political party for so many years of his life. By the time he had served his Term, Mukherjee had won the respect and admiration of people from across the political spectrum, including those who were his rivals when he was a political figure. He had the occasion to work with two prime ministers, belonging to two parties who were (and are) fiercely opposed to each other, and he managed to do so with aplomb.

16. Fateful decisions : choices that will shape China's future / Edited by Thomas Fingar and Jean C. Oi. - California: Stanford University Press, 2020. 446p.

Abstract: China's future will be determined by how its leaders manage its myriad interconnected challenges. In *Fateful Decisions*, leading experts from a wide range of disciplines eschew broad predictions of success or failure in favor of close analyses of today's most critical demographic, economic, social, political, and foreign policy challenges. They expertly outline the options and opportunity costs entailed, providing a cutting-edge analytic framework for understanding the decisions that will determine China's trajectory. Xi Jinping has articulated ambitious goals, such as the Belt and Road Initiative and massive urbanization projects, but few priorities or policies to achieve them. These goals have thrown into relief the crises facing China as the economy slows and the population ages while the demand for and costs of education, healthcare, elder care, and other social benefits are increasing. Global ambitions and a more assertive military also compete for funding and policy priority. These challenges are compounded by the size of China's population, outdated institutions, and the reluctance of powerful elites to make reforms that might threaten their positions, prerogatives, and Communist Party legitimacy. In this volume, individual chapters provide in-depth analyses of key policies relating to these challenges. Contributors illuminate what is at stake, possible choices, and subsequent outcomes. This volume equips readers with everything they need to understand these complex developments in context.

17. Thapar, Romila

Voices of dissent : an essay / Romila Thapar. - London: Seagull Books, 2020. 163p.

Abstract: People have argued since time immemorial. Disagreement is a part of life, of human experience. But we now live in times when any form of protest in India is marked as anti-Indian and met with arguments that the very concept of dissent was imported into India from the West. As Romila Thapar explores in her timely historical essay, however, dissent has a long history in the subcontinent, even if its forms have evolved through the centuries. In *Voices of Dissent: An Essay*, Thapar looks at the articulation of nonviolent dissent and relates it to various pivotal moments throughout India's history. Beginning with Vedic times, she takes us from the second to the first millennium BCE, to the emergence of groups that were jointly called the Shramanas--the Jainas, Buddhists, and Ajivikas. Going forward in time, she also explores the views of the Bhakti saints and others of the fifteenth and sixteenth centuries, and brings us to a major moment of dissent that helped to establish a free and democratic India: Mahatma Gandhi's satyagraha. Then Thapar places in context the recent peaceful protests against India's new, controversial citizenship law, maintaining that dissent in our time must be opposed to injustice and supportive of democratic rights so that society may change for the better.

18. Vengasseri, Ismail

1962 border war : Sino-Indian territorial disputes and beyond / Ismail Vengasseri. - New Delhi: SAGE Publications India, 2021. 284p.

Abstract: 1962 Border War: Sino-Indian Territorial Disputes and Beyond studies the historical antecedents of the origin and developments of the border dispute between the two Asian giants—India and China. It investigates why these newborn republics, despite their close ties in the international politics, chose a path of a large-scale military encounter in the winter of 1962. This book uses the classified Henderson Brooks-Bhagat Report and the CIA Staff Study Report to answer this question. The book debates how far internal bureaucratic hurdles, political intrigues and partisan interest in New Delhi have factored against Nehru’s China Policy. Further, this study reveals the impact of Cold War politics, CIA operations on the frontiers and the US strategy of projecting the Tibet factor on these two nations. The key significance of this study is that it reveals the historical factors behind the Sino-Indian frequent and ongoing skirmishes along the border.

19. Strangio, Sebastian

Cambodia : from Pol Pot to Hun Sen and beyond / Sebastian Strangio. - New Haven: Yale University Press, 2020. 334p.

Abstract: A fascinating analysis of the recent history of the beautiful but troubled Southeast Asian nation of Cambodia. To many in the West, the name Cambodia still conjures up indelible images of destruction and death, the legacy of the brutal Khmer Rouge regime and the terror it inflicted in its attempt to create a communist utopia in the 1970s. Sebastian Strangio, a journalist based in the capital city of Phnom Penh, now offers an eye-opening appraisal of modern-day Cambodia in the years following its emergence from bitter conflict and bloody upheaval.

20. Obama, Barack

Promised land / Barack Obama. - New York: Penguin Random House, 2020. 751p.

Abstract: In the stirring, highly anticipated first volume of his presidential memoirs, Barack Obama tells the story of his improbable odyssey from young man searching for his identity to leader of the free world, describing in strikingly personal detail both his political education and the landmark moments of the first term of his historic presidency—a time of dramatic transformation and turmoil. Obama takes readers on a compelling journey from his earliest political aspirations to the pivotal Iowa caucus victory that demonstrated the power of grassroots activism to the watershed night of November 4, 2008, when he was elected 44th president of the United States, becoming the first African American to hold the nation’s highest office. Reflecting on the presidency, he offers a unique and thoughtful exploration of both the awesome reach and the limits of presidential power, as well as singular insights into the dynamics of U.S. partisan politics and international diplomacy. Obama brings readers inside the Oval Office and the White House Situation Room, and to Moscow, Cairo, Beijing, and points beyond. We are privy to his thoughts as he assembles his cabinet, wrestles with a global financial crisis, takes the measure of Vladimir Putin, overcomes seemingly insurmountable odds to secure passage of the Affordable Care Act, clashes with generals about U.S. strategy in Afghanistan, tackles Wall Street reform, responds to the devastating Deepwater Horizon blowout, and authorizes Operation Neptune’s Spear, which leads to the death of Osama bin Laden.
