1. Feldman, Steven P.

Dictatorship by degrees: Xi Jinping in China / Steven P. Feldman. -Lanham, Maryland: Lexington Books, 2021. 311p.

Abstract: Dictatorship by Degrees: Xi Jinping in China traces the totalitarian elements that linger in China's governing policies and practices, such as extra-legal Anti-Corruption Campaign, great concentration of power in one man, increasing intolerance, increasing propaganda, increasing indoctrination, increasing self-criticism inside the Party, expansion of Party cells across society, increasing censorship, cult of personality, and mass incarceration in Xinjiang. Steven P. Feldman develops a concept of pretotalitarianism to explore these developments through extensive field data, including interviews with business executives, professors, lawyers, and non-profit executives, and observations of daily life. Feldman argues that Chinese political culture, based on the core principle of small group loyalties is inherently unstable, resulting in an ongoing tendency for leaders to concentrate power to survive and accomplish their goals. Under communist dictatorial political organization, totalitarian domination is always a temptation and risk.

2. Informal politics in the Middle East / Edited by Suzi Mirgani. - London: C. Hurst & Co., 2021. 282p.

Abstract: The culture of politics within any system of governance is influenced by how state and society interact, and how these relationships are mediated by existing political institutions, whether formal or informal. The chapters in this volume highlight two broad types of informal political engagement in the Middle East: civil action that works in tandem with the state apparatus, and civil action that poses a challenge to the state. In both cases, these activities can and do achieve tangible results for particular groups of people, as well as for the state. For many, informal politics and civil mobilization are not a choice, but a necessity to secure - collectively some kind of social security, through communal reciprocity and everyday activism.

3. Goff, A. Krista

Nested nationalism: making and unmaking nations in the Soviet Caucasus / Krista A. Goff. - New York: Cornell University Press, 2020. 319p.

Abstract: Nested Nationalism is a study of the politics and practices of managing national minority identifications, rights, and communities in the Soviet Union and the personal and political consequences of such efforts. Titular nationalities that had republics named after them in the USSR were comparatively privileged within the boundaries of "their" republics, but they still often chafed both at Moscow's influence over republican affairs and at broader Russian hegemony across the Soviet Union. Meanwhile, members of nontitular communities frequently complained that nationalist republican leaders sought to build titular nations on the back of minority assimilation and erasure. Drawing on extensive archival and oral history research conducted in Armenia, Azerbaijan, Dagestan, Georgia, and Moscow, Krista A. Goff argues that Soviet nationality policies produced recursive, nested relationships between majority and minority nationalisms and national identifications in the USSR. Goff pays particular attention to how these asymmetries of power played out in minority communities, following them from Azerbaijan to Georgia, Dagestan, and Iran in pursuit of the national ideas, identifications, and histories that were layered across internal and international borders. What mechanisms supported cultural development and minority identifications in communities subjected to assimilation politics? How did separatist movements coalesce among nontitular minority activists? And how does this historicization help us to understand the tenuous space occupied by minorities in nationalizing states across contemporary Eurasia? Ranging from the early days of Soviet power to post-Soviet ethnic conflicts, Nested Nationalism explains how Soviet-era experiences and policies continue to shape interethnic relationships and expectations today.

4. Globalizing regionalism and international relations / Edited by Beatrix Futak-Campbell. - Bristol: Bristol University Press, 2021. 240p.

Abstract: Building on the recent initiative to truly globalize the field of international relations, this book provides an innovative interrogation of regionalism. The book applies a globalizing framework to the study of regional worlds in order to move beyond the traditional conception of regionalism, which views regions as competing blocs dominated by great powers. Bringing together a wide range of case studies, the book shows that regions are instead dynamic configurations of social and political identities in which a variety of factors, including the less powerful, interact and partake in regionalization processes and have done so through the centuries.

5. Voeten, Erik

Ideology and international institutions / Erik Voeten. - New Jersey: Princeton University Press, 2021. 242p.

Abstract: A new theoretical framework for understanding how social, economic, and political conflicts influence international institutions and their place in the global order Today's liberal international institutional order is being challenged by the rising power of illiberal states and by domestic political changes inside liberal states. Against this backdrop, Ideology and International Institutions offers a broader understanding of international institutions by arguing that the politics of multilateralism has always been based on ideology and ideological divisions. Erik Voeten develops new theories and measures to make sense of past and current challenges to multilateral institutions. Voeten presents a straightforward theoretical framework that analyzes multilateral institutions as attempts by states to shift the policies of others toward their preferred ideological positions. He then measures how states have positioned themselves in global ideological conflicts during the past seventy-five years. Empirical chapters illustrate how ideological struggles shape the design of international institutions, membership in international institutions, and the critical role of multilateral institutions in militarized conflicts. Voeten also examines populism's rise and other ideological threats to the liberal international order. Ideology and International Institutions explores the essential ways in which ideological contestation has influenced world politics.

6. Intelligence relations in the 21st Century / Edited by Tom Roseth and John Michael Weaver. - Switzerland: Palgrave Macmillan, 2020. 168p.

Abstract: This book analyzes intelligence relations in an unsecure world and provides contributions on intelligence processes, interstate intelligence relations and hybrid warfare. Tactical, operational and strategic intelligence relations, both within and between intelligence agencies, and between states, are essential to support decision makers. This book ties together how intelligence adapts to security changes, global power shifts and the trend from globalization to a more nationalistic approach. During such changes, there is a need to analyze intelligence sharing relationships. Bringing together practitioners and academics, the book presents a plurality of approaches relative to intelligence relations that seek to advance the debate in the field.

7. Diplomacy and the future of world order / Edited by Chester A. Crocker, Fen Osler Hampson and Pamela Aall. - Washington, DC: Georgetown University Press, 2021. 361p.

Abstract: Three scenarios for future approaches to peace and conflict diplomacy, explored through the lens of regional perspectives and security threats Diplomacy in pursuit of peace and security faces severe challenges not seen in decades. The reemergence of strong states, discord in the UN Security Council, destabilizing transnational nonstate actors, closing space for civil society within states, and the weakening of the international liberal order all present new obstacles to diplomacy. In Diplomacy and the Future of World Order, an international group of experts confronts these challenges to peace and conflict diplomacy defined as the effort to manage others' conflicts, cope with great power competition, and deal with threats to the state system itself. In doing so, they consider three potential scenarios for world order where key states decide to go it alone, return to a liberal order, or collaborate on a case-by-case basis to address common threats and problems. These three scenarios are then evaluated through the prism of regional perspectives from around the world and for their potential ramifications for major security threats including peacekeeping, nuclear nonproliferation, cyber competition, and terrorism. Editors Chester A. Crocker, Fen Osler Hampson, and Pamela Aall conclude the volume by identifying emerging types of diplomacy that may form the foundation for global peacemaking and conflict management in an uncertain future.

8. Brook, Timothy

Great state: China and the world / Timothy Brook. - New York: HarperCollins Publishers, 2020. 442p.

Abstract: The world-renowned scholar and author of Vermeer's Hat does for China what Mary Beard did for Rome in SPQR: Timothy Brook analyzes the last eight centuries of China's relationship with the world in this magnificent history that brings together accounts from civil servants, horse traders, spiritual leaders, explorers, pirates, emperors, migrant workers, invaders, visionaries, and traitors-creating a multifaceted portrait of this highly misunderstood nation. China is one of the oldest states in the world. It achieved its approximate current borders with the Ascendancy of the Yuan dynasty in the thirteenth century, and despite the passing of one Imperial dynasty to the next, has maintained them for the eight centuries since. China remained China through the Ming, the Qing, the Republic, the Occupation, and Communism. But despite the desires of some of the most powerful people in the Great State through the ages, China has never been alone in the world. It has had to contend with invaders as well as foreign traders and imperialists. Its rulers for the majority of the last eight centuries have not been Chinese. China became a mega-state not by conquering others, Timothy Brook contends, but rather by being conquered by others and then claiming right of succession to the empires of those Great States. What the Mongols and Manchu ruling families wrought, the Chinese ruling families of the Ming, the Republic, and the People's Republic, have perpetuated. Yet a contemporary Chinese idea of a 'fatherland' that is, and always has been, completely and naturally Chinese persists. Brook argues that China, like everywhere, is the outcome of history, and like every state, rests on its capacities to conquer and suppress. In The Great State, Brook examines China's relationship with the world at large for the first time, from the Yuan through to the present, by following the stories of ordinary and extraordinary people navigating the spaces where China met, and continues to meet, the world.

9. Linking India and eastern neighbours: development in the northeast and borderlands / Edited by H. Srikanth and Munmun Majumdar. - New Delhi: SAGE Publications, 2021. 310p.

Abstract: Linking India and Eastern Neighbours: Development in the Northeast and Borderlands studies different aspects of India's bilateral relations with neighbouring countries and discusses implications of development initiatives in India's northeastern region (NER) and its borderlands. The NER shares borders with five countries. The central government has shown interest in developing infrastructure in the NER, and state governments are taking initiatives to promote trade relations with the bordering countries. The book discusses the causes for underdevelopment and examines the initiatives taken to overcome the problems of the landlocked region. It provides a comprehensive account of varied processes at work in India's northeastern borderlands. The book looks closely at the lifeworld of the border communities and myriad cross-border interactions. It throws light on the economic potentiality and preparedness of the NER, the significance of border haats, diverse manifestations of border crossing and nature of inter-ethnic interactions. The book also explains the theoretical significance and practical relevance of studying border processes.

10. Raghavan, Srinath

Fierce enigmas: a history of the United States in South Asia / Srinath Raghavan. - New York: Basic Books, 2018. 486p.

Abstract: South Asia looms large in American foreign policy. Over the past two decades, we have spent billions of dollars and thousands of human lives in the region, to seemingly little effect. As Srinath Raghavan reveals in Fierce Enigmas, this should not surprise us. For 230 years, America's engagement with India, Afghanistan, and Pakistan has been characterized by short-term thinking and unintended consequences. Beginning with American traders in India in the eighteenth century, the region has become a locus for American efforts-secular and religious-to remake the world in its image.

11. Gordon, Philip H.

Losing the long game: the false promise of regime change in the Middle East / Philip H. Gordon. - New York: St. Martin's Press, 2020. 358p.

Abstract: The definitive account of how regime change in the Middle East has proven so tempting to American policymakers for decades-and why it always seems to go wrong. "It's a first-rate work, intelligently analyzing a complex issue, and learning the right lessons from history." Fareed Zakaria Since the end of World War II, the United States has set out to oust governments in the Middle East on an average of once per decade—in places as diverse as Iran, Iraq, Afghanistan (twice), Egypt, Libya, and Syria. The reasons for these interventions have also been extremely diverse, and the methods by which the United States pursued regime change have likewise been highly varied, ranging from diplomatic pressure alone to outright military invasion and occupation. What is common to all the operations, however, is that they failed to achieve their ultimate goals, produced a range of unintended and even catastrophic consequences, carried heavy financial and human costs, and in many cases left the countries in question worse off than they were before. Philip H. Gordon's Losing the Long Game is a thorough and riveting look at the U.S. experience with regime change over the past seventy years, and an insider's view on U.S. policymaking in the region at the highest levels. It is the story of repeated U.S. interventions in the region that always started out with high hopes and often the best of intentions, but never turned out well. No future discussion of U.S. policy in the Middle East will be complete without taking into account the lessons of the past, especially at a time of intense domestic polarization and reckoning with America's standing in world.

12. Handbook of BRICS and emerging economies / Edited by P. B. Anand, Shailaja Fennell and Flavio Comim. - UK: Oxford University Press, 2021. 1141p.

Abstract: This book focuses on one such emerging co-operation mechanism of BRICS but also more widely on those five countries and other similar economies. As a global depression looms large, global economic recovery depends on the performance of not only its largest economies but also many other important and significant economies within the so called G20 group. Even prior to the COVID-19 outbreak multilateral institutions have been under considerable strain, as with the relationship between the United States of America and China, and risks to global economic recovery appear very real. This book brings together multi-disciplinary perspectives from over sixty scholars and it presents a comprehensive and deep dive into the BRICS and emerging economies and into an understanding the political, economic, and social contexts that can help in designing approaches for recovery and regaining the last momentum in the journey towards the Sustainable Development Goals.

13. McCartney, Matthew

Dragon from the mountains: the CPEC from Kashgar to Gwadar / Matthew McCartney. - Cambridge: Cambridge University Press, 2021. 274p.

Abstract: China has promised to invest more than \$60billion in Pakistan, in roads, rail, energy and a deep-water port at Gwadar. This is unprecedented relative to decades of minimal foreign direct investment (FDI) entering Pakistan. This is the China-Pakistan Economic Corridor (CPEC). Support for CPEC in Pakistan is widespread and encompasses much of academia, the military, the mainstream political leadership, and civil society. Supporters argue that CPEC offers the potential to transform Pakistan and support rapid, equitable and sustainable economic growth. Detractors of CPEC argue that it will more likely tip Pakistan into a dependent debt-relationship with China and that it will facilitate more Chinese imports into Pakistan posing a threat to Pakistan's industrial base. This book utilizes an in-depth understanding of economic change in contemporary China and Pakistan, and economic theory and studies of big infrastructure projects from the contemporary and historical world to evaluate these contrasting views about CPEC.

14. China's strategic arsenal: worldview, doctrine, and systems / Edited by James M. Smith and Paul J. Bolt. - Washington, DC: Georgetown University Press, 2021. 269p.

Abstract: China's strategic capabilities and doctrine have historically differed from the United States' and Russia's. China has continued to modernize and expand its arsenal despite its policy of no first use, while the United States and Russia have decreased deployed weapons stocks. This volume brings together an international group of distinguished scholars to provide a fresh assessment of China's strategic military capabilities, doctrines, and political perceptions in light of rapidly advancing technologies, an expanding and modernizing nuclear arsenal, and an increased greatpower competition with the United States. Analyzing China's strategic arsenal is critical for a deeper understanding of China's relations with both its neighbors and the world. Without a doubt, China's arsenal is growing in size and sophistication, but key uncertainties also lie ahead. Will China's new capabilities and confidence lead it to be more assertive and take more risks? Will China's nuclear traditions change as the strategic balance improves? Will China's approach to military competition be guided by a notion of strategic stability or not? Will there be a strategic arms race with the United States? China's Strategic Arsenal provides a current understanding of these issues as we strive for a stable strategic future with China.

15. Payne, Kenneth

I, warbot: the dawn of artificially intelligent conflict / Kenneth Payne. - United Kingdom: Hurst & Company, 2021. 321p.

Abstract: Artificial Intelligence is going to war. Intelligent military systems are already reshaping conflict—from the chaos of battle, with pilotless drones and robot tanks, to the headquarters far from the action, where generals and politicians use technology to weigh up what to do. AI changes how we fight, and even how likely it is that we will. Warbots will be faster, more agile and more deadly than today's crewed weapons. New tactics are already emerging, but much deeper thinking is needed. When will an intelligent machine escalate, and how might you deter it? Can robots predict the future? And what happens to the 'art of war' as machines become creative? An international campaign against 'killer robots' hopes to ban AI from conflict. But the genie is out—autonomous weapons are too useful for states to outlaw. Still, crafting sensible rules for our warbots is possible. This fascinating book shows how it might be done.

16. Ashour, Omar

How ISIS fights: military tactics in Iraq, Syria, Libya and Egypt / Omar Ashour. - Edinburgh: Edinburgh University Press, 2021. 243p.

Abstract: How did ISIS -a widely hated, massively outnumbered and ludicrously outgunned organization - manage to occupy over 120 cities, towns and villages from the Southern Philippines to Western Libya? Seeking to understand ISIS's combat effectiveness, Omar Ashour analyses the military and tactical innovations of ISIS and their predecessors in Iraq, Syria, Libya and Egypt. He shows how their capacity to mix conventional military tactics with innovative guerrilla warfare and urban terrorism strategies allowed ISIS to expand and endure beyond expectations.

17. Dietze, Carola

Invention of terrorism in Europe, Russia, and the United States / Carola Dietze. - London: Verso, 2021. 646p.

Abstract: This book examines key cases of terrorist violence to show that the invention of terrorism was linked to the birth of modernity in Europe, Russia and the United States, rather than to Tsarist despotism in 19th century Russia or to Islam sects in Medieval Persia. Combining a highly readable historical narrative with analysis of larger issues in social and political history, the author argues that the dissemination of news about terrorist violence was at the core of a strategy that aimed for political impact on rulers as well as the general public. Dietze's lucid account also reveals how the spread of knowledge about terrorist acts was, from the outset, a transatlantic process. Two incidents form the book's centerpiece. The first is the failed attempt to assassinate French Emperor Napoleon III by Felice Orsini in 1858, in an act intended to achieve Italian unity and democracy. The second case study offers a new reading of John Brown's raid on the arsenal at Harpers Ferry in 1859, as a decisive moment in the abolitionist struggle and occurrences leading to the American Civil War. Three further examples from Germany, Russia, and the US are scrutinized to trace the development of the tactic by first imitators. With their acts of violence, the "invention" of terrorism was completed. Terrorism has existed as a tactic since then and has essentially only been adapted through the use of new technologies and methods.

18. Strathern, Paul

Empire: a new history of the world: the rise and fall of the greatest civilizations / Paul Strathern. - New York: Pegasus Books, 2020. 262p.

Abstract: A dazzling new history of the world told through the ten major empires of human civilization. Eminent historian Paul Strathern opens the story of Empire with the Akkadian civilization, which ruled over a vast expanse of the region of ancient Mesopotamia, then turns to the immense Roman Empire, where we trace back our Western and Eastern roots. Next the narrative describes how a great deal of Western Classical culture was developed in the Abbasid and Umayyad Caliphates. Then, while Europe was beginning to emerge from a period of cultural stagnation, it almost fell to a whirlwind invasion from the East, at which point we meet the Emperors of the Mongol Empire . . . Combining breathtaking scope with masterful narrative control, Paul Strathern traces these connections across four millennia and sheds new light on these major civilizations-from the Mongol Empire and the Yuan Dynasty to the Aztec and Ottoman, through to the most recent and biggest empires: the British, Russo-Soviet, and American. Charting five thousand years of global history in ten lucid chapters, Empire makes comprehensive and inspiring reading to anyone fascinated by the history of the world.

19. Schwartz, Thomas A.

Henry Kissinger and American power: a political biography / Thomas A. Schwartz. - New York: Hill and Wang, 2020. 548p.

Abstract: Over the past six decades, Henry Kissinger has been America's most consistently praised and reviled public figure. He was hailed as a "miracle worker" for his peacemaking in the Middle East, pursuit of détente with the Soviet Union, negotiation of an end to the Vietnam War, and secret plan to open the United States to China. He was assailed from the left and from the right for his indifference to human rights, complicity in the pointless sacrifice of American and Vietnamese lives, and reliance on deception and intrigue. Was he a brilliant master strategist the 20th century's greatest 19th century statesman" or a cold-blooded monster who eroded America's moral standing for the sake of self-promotion? In this masterfully researched biography, the renowned diplomatic historian Thomas Schwartz offers an authoritative, and fair-minded, answer to this question. While other biographers have engaged in hagiography or demonology, Schwartz takes a measured view of his subject. He recognizes Kissinger's successes and acknowledges that Kissinger thought seriously and with great insight about the foreign policy issues of his time, while also recognizing his failures, his penchant for backbiting, and his reliance on ingratiating and fawning praise of the president as a source of power. Throughout, Schwartz stresses Kissinger's artful invention of himself as a celebrity diplomat and his domination of the medium of television news. Rounded and textured, and rich with new insights into key dilemmas of American power, Henry Kissinger and American Power stands as an essential guide to a man whose legacy is as complex as the last sixty years of US history itself.

20. Borderlands of China and Korea: historical changes in the contact zones of East Asia / Edited by Yong-Ku Cha. - Lanham, Maryland: Lexington Books, 2020. 266p.

Abstract: This volume utilizes the concept of contact zones to reconceptualize the time and space around East Asian borders as meeting zones where multiple races, nations, and cultures interacted through the processes of exchange, coexistence, and acculturation. Focusing especially on the borderlands of China and Korea, the contributors document the shifts and repositioning of the contact zones of East Asia as well as the encounters and conflicts that transpired in these spaces, with historical materials spanning the period from the first to the early twentieth century's and geographical regions from the Tibetan Plateau to Manchuria to the Korean Peninsula. What emerges is a rich account of how the historical changes in the contact zones significantly shaped the history of East Asia as a whole.
