ANGLO–AMERICAN NUCLEAR PARTNERSHIP

1. Doyle, Suzanne

This article provides a comparative analysis of the sales of the Trident nuclear missile system to Britain by the Jimmy Carter and Ronald Reagan administrations. Both governments viewed the Anglo–American nuclear partnership as a tool within their wider foreign policy kit and utilised the sale of Trident to influence British defence policy. For these reasons, each administration saw the Trident sale as part of an Anglo–American transactional defence relationship.

7. Poznanski, Kazimierz  
Confucian economics: how is Chinese thinking different?  
The Chinese have their economics. Not yet acknowledged, it is contained in the Confucian thought. Called by me ‘Confucian economics’, it sharply differs from the Western ‘Liberal economics’. Individuals seek posterity through offspring, rather than ‘instant gratification’. Resources are not seen as scarce but as abundant. Rather than take resources from others, people work to make a living. The work ethics and not the profit margin is a key motive. Individuals work not for themselves but for their family.

U.S. counterterrorism (CT) forces that deployed to Iraq in 2003 as Task Force 714 (TF 714) faced an ugly surprise. Tasked to dismantle the al-Qaeda in Iraq (AQI) dominated insurgency, the organization could not achieve that mission. General Stanley McChrystal, who commanded TF 714 concluded, “we were losing to an enemy … we should have dominated.” But TF 714 transformed in the midst of war and during 2006-2009 was able to largely dismantle AQI's clandestine networks to a degree that they could no longer function in a cohesive manner. By developing the capacity to operate inside those networks, TF 714 was able, in the words of General McChrystal, to “claw the guts out of AQI.”.
