-MEDIA

3. Haynes, Jonathan

Keeping Up: The Corporatization of Nollywood's Economy and Paradigms for Studying African Screen Media.

Africa Today, 64(4), 2018(Summer): 3-29.

The politicized paradigm that has historically informed discourses on African cinema has been seriously challenged, and, since the recent intervention of transnational corporations into the production and distribution of Nigerian media, the model of the African popular arts is still necessary but no longer sufficient for framing the study of Nollywood. The corporate intervention is related to a shift in media platforms: the sale of discs is being overshadowed by internet distribution and television broadcasting, and smartphones and multiplex cinemas supplement home viewing.

10. Popova, Maria and Post, Vincent

Prosecuting high-level corruption in Eastern Europe.

Communist and Post-Communist Studies, 51(3), 2018(September): 231-244.

Do Eastern European courts effectively constrain politicians and uphold the rule of law? Criminal prosecution of grand (high-level) corruption can further the central principle of equal responsibility under the law by demonstrating that even powerful political actors have to submit to the laws of the land. This article introduces the Eastern European Corruption Prosecution Database, which contains entries for all cabinet ministers (927 in total) who served in a government that held office in one of seven post-Communist Eastern European countries since the late 1990s. The systematic data collection reveals that Bulgaria, Romania and Macedonia consistently indict more ministers than Croatia, the Czech Republic, and Poland; Slovakia has barely indicted anyone.

30. Anand, Abhishek

Paranoia or Prudence? How Much Capital Is Enough for the RBI?
Economic & Political Weekly, 53(48), 2018(08 December): 35-44.

To assess whether the Reserve Bank of India is overcapitalised, two approaches are employed. First, the methodology and risk tolerance parameters used by major central banks are applied to the RBI's balance sheet. Second, a simple cross-country econometric framework relating optimal capital to its possible determinants is used. Both suggest (conservatively) that the RBI has substantial excess capital—in excess of `4.5 lakh crore—which could be profitably deployed elsewhere, not for financing general government operations or the deficit but, for example, to recapitalise the public sector banks conditional on them being reformed.
